Professional Summary

Senior Full-Stack Developer specializing in Laravel ecosystem and modern JavaScript frameworks. Experienced in building scalable SaaS platforms, API-first architectures, and high-performance backend systems. Strong focus on clean architecture, security best practices, and scalable database design. Comfortable working in fast-moving startup environments and collaborating with product, AI, and UX teams.

Technical Skills

Backend: Laravel, PHP, RESTful APIs, MVC Architecture

Frontend: React, Next.js, JavaScript, HTML, CSS

Databases: PostgreSQL, MySQL

Caching & Performance: Redis

Authentication & Security: Laravel Sanctum, JWT, OAuth

Cloud & Storage: AWS S3

DevOps & Tools: Git, GitLab CI/CD, Vercel

Architecture: SaaS systems, modular architecture, API-first development

Professional Experience

Full-Stack Developer — Freelance / Independent Projects
Designed and developed multiple Laravel-based platforms and SaaS-oriented systems, focusing on scalable backend architecture and API-driven development. Implemented authentication systems, role-based access control, and high-performance database structures. Worked with modern frontend stacks including React for dynamic user interfaces.

Key Projects

SaaS Platform Backend Architecture
Designed and implemented a modular Laravel backend supporting multi-tenant SaaS features, role-based permissions, and scalable database architecture.

AI-Integrated Web Applications
Developed backend services capable of integrating with external AI APIs such as OpenAI for automated responses, analysis, and intelligent user interaction features.

REST API Systems
Built multiple API-first platforms using Laravel, enabling scalable integrations with frontend frameworks and third-party services.

Projects

1. ArenaLink Platform :

Gaming centers booking platform built with Laravel.

2. SaaS Architecture Project :

Modular Laravel backend designed for scalable SaaS applications.

3. E-commerce Platform :

Online store built with Laravel including payment and order management system.
